DETAILED ACTION

Receipt is acknowledged of amendment and remarks filed on 5/1/08 and 7/1/08. Receipt is also acknowledged of certified translated foreign priority document filed on 5/1/08. Claims 10-20 have been added as per applicants' amendment dated 5/15/08. Claims 1-8 and 10-20 are pending and claim 9 is withdrawn from consideration being drawn to non-elected subject matter.

In view of certified translated foreign priority document, the rejection of claims 1-18 under 102 (e) over commonly owned PGPUB US 2004/0516815 and PGPUB US 2004/0157984 is hereby withdrawn.

Claim Rejections - 35 USC § 103

Claims 1-8 and 10-20 are rejected under 35 U.S.C. 103(a) as being obvious over the combination of EP 1,166,766 ('766) and U. S. patent 5,876,705 ('705).

The instant application is claiming hair cleansing composition comprising:

- 1. Amphipathic amide lipid of formula 1*
- 2. compound belonging to B(species is ethylene glycol distearate)*
- 2. surfactant*
- 3. cationic polymer*

EP '766 teaches external preparation compositions. See the abstract, and see page 2, formula I for ingredient I claimed. see also pages 3-5 for the amide lipids , which are species belonging to formula I (Ingredient I). EP '766 at paragraph 22 teaches adding surfactants to compositions. The weight percent of the surfactant is 0.01-20% and the weight percent of amide lipid 0.001-50%. EP '766 at paragraph 24 teaches hair care applications and this includes shampoo. EP under this paragraph suggests adding components ordinarily employed in hair

cosmetics. Examples 3-4 are drawn to hair formulations. The difference between EP and the instant application is EP does not teach claimed species belonging to B and cationic polymer.

Patent '705 teaches conditioning shampoo compositions. See the abstract; see col.2, ll 25-30 for anionic, amphoteric and non-ionic surfactant. See col.s 4-5 and col.6, ll 1-34 for anionic surfactant. See col.6, ll 35-68 and col.s 7-8 and col.9, ll 1-6 for amphoteric surfactant, see col.9, ll 8-68 and col.10, ll 1-14 for non ionic surfactant, see col. 17, line 7 through col.19, line 27 for cationic polymers. Patent at col.2, ll 35-39 teaches conditioning agents and these can be silicones or cationic surfactant or cationic polymers. see col.19, ll 5-20 for claimed cationic cellulose and cationic guar gum. See paragraph bridging col.s 21-22 for suspending agents. Preferred suspending agent is claimed species(see col.21, ll 60-65). See also examples VI-X for ethylene glycol distearate, cationic polymer, which is polyquaternium 10 and surfactant.

Accordingly it would be obvious to one of ordinary skill in the art at the time the invention was made to modify the compositions of EP '7669 and combine with agents that are conventionally used in hair care like surfactants , cationic polymers and suspending agents taught by patent '705 expecting beneficial effect to hair. One of ordinary skill in the art would be motivated to add the ingredients of '705 with the reasonable expectation of success that the compositions which has the diamide provide moisturizing feel and silkiness to the hair and adding cationic polymers provide conditioning property to the hair and adding surfactant provide cleansing actions. Thus the compositions not only cleanse the hair but also provide moisturizing and conditioning properties to the hair. This is a prima facie case of obviousness.
